## ABSTRACT

UPDATED 24 August 2015. This sample paper describes the UPDATED 13 requirements for SIGCHI sample paper procedures, and offers formatting recommendations for writing for the worldwide SIGCHI reading public. Please review this document even if you have submitted to SIGCHI conferences before, as some format details have changed relative to previous years. Abstracts should be about 150 words and are required.

Authors' choices; of terms; separated; by semicolons; commas; within terms only; this section is required.

ACM Classification Keywords: H.5.m. Information interfaces and presentation (e.g., HCI):

ACM Classification Keywords: H.5.m. Information interfaces and presentation (e.g., HCI):

Miscellaneous; See <http://acm.org/about/class/1998> for the full list of ACM classifiers. This section is required.

INTRODUCTION: This format is to be used for submissions that are published in conference proceedings. We wish to give this volume a consistent, high-quality appearance. We therefore ask that authors follow some simple guidelines. You should format your paper exactly like this document. The easiest way to do this is to replace the content with your own material.

This format is to be used for submissions that are published in the conference proceedings. We wish to give this volume a consistent, high-quality appearance. We therefore ask that authors follow some simple guidelines. You should format your paper exactly like this document.

The easiest way to do this is to replace the content with your own material.

## PAGE SIZE AND COLUMNS

This document describes how to prepare your submissions On each page your material should fit within a rectangle of 7 x 9.55 in (18 x 23.2 cm), centered on a US letter page (8.5x11 in) beginning 0.75 in (1.9 cm) from the top of the page, with a 0.35 in (0.85 cm) space between two 3.35 in (8.4 cm) columns. Right margins should be justified, not ragged. Please be sure your document and PDF are US letter and not A4.

## TYPESET TEXT

The styles contained in this document have been modified now

supports three different publication options:

Paste the appropriate copyright/license statement here. ACM now supports three different ACM copyright options:

ACM holds the copyright on the work. This is the historical approach.

• License: The author(s) retain copyright, but ACM receives an exclusive publication license.

• License: The author(s) wish to pay for the work to be open access. The additional fee must be paid to ACM.

• Open Access: The author(s) wish to pay for the work to be open

This text field is large enough to hold the appropriate release statement.

This text field is large enough to hold the appropriate release statement. This text field is single-spaced in Times New Roman 8-point font. Please do not change or modify the size of this text box. Each submission will be assigned a DOI string to be included here.

Each submission will be assigned a DOI string to be included here.

from the default styles to reflect ACM formatting conventions. Content paragraphs like this one are

on each page you material should fit within a rectangle of 7 x 9.55 in (18 x 23.5 cm), centered on a US letter page (8.5x11 in)

beginning 0.75 in (1.9 cm) from the top of the page, with a 0.35 in (0.85 cm) space between two 3.35 in (8.4 cm) columns. Right margins should be justified, not ragged. Please be sure your document and PDF are US

letter and not A4.

18-point bold (the Title style in this document). Authors' names should be in Times New Roman or Times Roman

12-point bold (Author Name style), and affiliations in the font as 12-point regular (Author Affiliation style).

The styles contained in this document have been modified from the default styles to reflect ACM formatting conventions. For example, content paragraphs like this one are

three authors, you may have to place some address information in a footnote, or in a named section at the end of your paper. Names may optionally be placed in a single

centered row instead of at the top of each column. Leave run across the full width of the page in a single column 7 in one 10-point line of white space below the last line of

affiliations. 18-point bold (the Title style in this document). Authors' names should be in Times New Roman or Times Roman

If you need a 4th block for an additional author with a different affiliation, click on the table, click "layout" under "table tools", and click "insert left" or "insert right". Then

To position names and addresses, use a single-row table with invisible borders, as in this document. Alternatively,

and within the "Table" tab, click the tab box for "Preferred Width" and enter "7"

center all name and address text on the page; for two If addresses, use two centered tab stops, and so on. For more

than three authors, you may have to place some address information in a footnote, or in a named section at the end of your paper. Leave one 10-point line of white space

below the last line of affiliations.

Abstract and Keywords

Every submission should begin with an abstract of about 150 words followed by a set of keywords. The abstract and

keywords should be placed in the left column of the first

different affiliation, click on the table, click "layout" under "table tools", and click "insert left" or "insert right". Then

concise statement of the problem, approach, and

right-click anywhere on the table, click "Table Properties", conclusions of the work described. It should clearly state

and within the "Table" tab, click the tab box for "Preferred the paper's contribution to the field of HCI."

Width" and enter "7".

If you need author blocks for only 1 or 2 authors, you

should remove one column from the table. Right-click in

for the unwanted cell, click "Delete Cell", click "Delete entire

column", then click "OK". Repeat if necessary.

In appearance to Times New Roman 10-point. Other than

Helvetica or Arial headings, please use sans-serif or non-

# SIGCHI

## Abstract and Keywords

Every submission should begin with an abstract of about 150 words, followed by a set of keywords. The abstract and keywords should be placed in the left column of the first page under the left half of the title. The abstract should be a concise statement of the problem, approach, and conclusions of the work described. It should clearly state the paper's contribution to the field of HCI.

## Normal or Body Text

Please use 10-point Times New Roman or Times Roman font (the Normal style), or, if this is unavailable, another proportional font with serifs, as close as possible in appearance to Times New Roman 10-point. Other than Helvetica or Arial headings, please use sans-serif or non-proportional fonts only for special purposes, such as source code text.

Karat 34.9 103,322

## First Page Copyright Notice

Table 1. Table captions should be placed below the table. We recommend table lines be 1 point, 25% gray. Minimize use of unnecessary table lines (see page 1 bottom of column 1). Accepted papers will be distributed in the conference proceedings. They will also be placed in the ACM Digital Library, where they will remain accessible to thousands of researchers and practitioners worldwide. ACM's copyright and permissions policy is here:

[http://acm.org/publications/policies/copyright\\_policy](http://acm.org/publications/policies/copyright_policy)

## First Page Copyright Notice

The first page of the document has the correct ACM SIGCHI copyright notice beyond the first start at the top of the page and continue in double-column format. The two columns on publication day will be distributed. The two columns on the last page should be approximately equal length. Library, where they will remain accessible to thousands of researchers and practitioners worldwide. ACM's copyright and permissions policy is here:

[http://acm.org/publications/policies/copyright\\_policy](http://acm.org/publications/policies/copyright_policy)

## Subsequent Pages

On pages beyond the first, start at the top of the page and continue in double-column format. The two columns on publication day will be distributed. The two columns on the last page should be approximately equal length. Library, where they will remain accessible to thousands of researchers and practitioners worldwide. ACM's copyright and permissions policy is here:

[http://acm.org/publications/policies/copyright\\_policy](http://acm.org/publications/policies/copyright_policy)

## References and Citations

The heading of a section should be in Arial 9-point bold all, in capitals (Heading 1 style). Sections should not be numbered!

Referenced by numbers in brackets [1,3,4].

## Subsections

### Caption – pre- Caption – 2003 and Caption – 2002

Headings of subsections should be in Arial 9-point bold with initial letters capitalized (Heading 2 style). For sub-sections and sub-subsections, a word like the or of is not capitalized unless it is the first word of the heading.

**Table 1. Table captions should be placed below the table. We recommend table lines be 1 point, 25% black. Minimize use of unnecessary table lines.**

italic with initial letters capitalized (Heading 3 style).

<sup>1</sup> Use footnotes sparingly, if at all.

## FIGURES AND CAPTIONS

Your references should be published materials accessible to the public. Internal technical reports may be cited only if they are easily accessible (i.e., you provide the address for obtaining the report within your citation) and may be obtained by any reader for a nominal fee. Proprietary information may not be cited. Private communications should be acknowledged in the main text, not referenced (e.g., [Boydiello, personal communication]). "Table 1" or "References", should be in the ACM heading format: tableupThe.org/publications/submissions/latextyleThis ouincludesCitations to internetResources[1,4,8,1] according to ACM format, although it is often appropriate to include All figures should also include alt text for improved accessibility. In Word, right click the figure, and select Format Picture | Layout | Alt Text. Papers and notes may use figures which are included in the page limit. The heading of a section should be in Arial 9-point bold, all in capitals (Heading 1 style). Sections should not be numbered.

## Inserting Images

Occasionally MS Word generates larger-than-necessary PDF files when images inserted into the document are manipulated in MS Word. To minimize this problem, use the heading of a section should be in Arial 9-point bold, all in capitals (Heading 1 style). Sections should not be numbered.

### Sub-sections

Headings for sub-subsections should be in Arial 9-point italic with initial letters capitalized (Heading 3 style). Text style (as in Table 1). For improved accessibility, header rows of tables should be marked. In Word, right-click Place figures and tables at the top or bottom of the Repetition header row or the top of each page. All tables should include alt text for accessibility (Table Properties | Alt Text).

**QUOTES** Captions should be Times New Roman 9-point bold. Quotes may be italicized and placed inline (Anab., "2F").

Long ("Figure 2") centered, and placed beneath the figure or notable. The words "Figure" and "Table" should be spelled out (e.g., "Figure" rather than "Fig.") wherever they occur.

**LANGUAGE, STYLE AND CONTENT** All figures should also include alt text for improved accessibility. In Word, right click the figure, and select Format Picture | Layout | Alt Text. Papers and notes may (e.g., British, Canadian, US, etc.) provided this is done consistently. Hyphenation is optional. To ensure suitability for an international audience, please use English in the proceedings.

- **Video** in paper might be accompanied by a short video figure up to five minutes in length. However, the paper should stand on its own without the video figure, as the video may not be available to everyone who reads the paper.
- **Inserting Images** explain all technical terms that may be occasionally MS Word generates larger-than-necessary PDF files when images inserted into the document are manipulated in MS Word. To minimize this problem, use an image editing tool to resize the image at the appropriate printing resolution (usually 300 dpi), and then insert the image into Word using Insert | Picture | From File.

**Figure 2. Sample of a wide figure.** Be sure to place at the top or bottom of the page. Ensure that important information is legible in both black-and-white and color printing. Image: CC-BY-ND ayman on Flickr.

#### LANGUAGE, STYLE, AND CONTENT

- The written and spoken language of SIGCHI is English.
- Spelling and punctuation (may use any dialect of English (e.g., British, Canadian, US, etc.) provided this is done consistently).
- Explain hyphenations. Ensure that your whole suitability for an international audience, please:

  - Write in a straightforward style.

- Try to avoid long or complex sentence structures.
- Explain colloquial language and puns. Understanding of English. Humor and irony are difficult to translate.

  - Use common and basic vocabulary (e.g., use the word “unusual” rather than the word “arcane”).
  - Briefly define or explain all technical terms that may be unfamiliar to readers.

- Use unambiguous forms for culturally localized concepts, such as dates, times, currencies, and numbers (e.g., “1-5-97” or “5/1987” may mean January or 1 May, and “seven o’clock” may mean 7:00 am or 19:00). For currency, indicate equivalences (“Participants were paid ₩22, or roughly US\$29.”)
- Be careful with the use of gender-specific pronouns (he, she) and other gendered words (chairman, manpower, man-months). Use inclusive language that is gender-neutral (e.g., she or he, they, s/he, chair, staff, staff-hours, person-years). See the Guidelines for Bias-Free Writing for further advice and examples regarding gender and other personal attributes [9]. Be particularly aware of considerations around writing about people with disabilities.
- If possible, use the full (extended) alphabetic character set for names of persons, institutions, and places (e.g., Grønbæk, Lafrenière, Sánchez, Nguyễn, Universität, Weissenbach, Züllighoven, Århus, etc.). These characters are already included in most versions and variants of Times, Helvetica, and Arial fonts.

- Explain “insider” comments. Ensure that your whole audience understands any reference whose meaning you do not describe (e.g., do not assume that everyone has used an Android phone, or a particular application).
- Explain colloquial language and puns. Understanding phrases like “red herring” may require a local knowledge of English. Humor and irony are difficult to translate.

1. Add alternative, unambiguous forms for culturally localized concepts, such as times, dates, currencies, and numbers (e.g., “1-5-97” or “5/1987” may mean January or 1 May, and “seven o’clock” may mean 7:00 am or 19:00). For currencies, indicate equivalences: “Participants were paid ₩22, or roughly US\$29.”
2. Mark table headings.
3. Generate a tagged PDF.
4. Verify the file format.
5. Set the tab order to “Use Document Structure”

For more information and links to instructions and resources, please see: <http://chi2016.acm.org/accessibility>.

#### PAGE NUMBERING, HEADERS, AND FOOTERS

Your final submission should not contain footer or header information at the top or bottom of each page. Specifically, your final submission should not include page numbers. Initial submissions may include page numbers, but these must be removed for camera-ready. Page numbers will be added to the PDF when the proceedings are assembled.

#### PRODUCING AND TESTING PDF FILES

We recommend that you produce a PDF version of your submission well before the final deadline. Your PDF file must be ACM DL Compliant. The requirements for an ACM Compliant PDF are available at:

<http://sheridanprinting.com/typedept/ACM-distilling-settings.htm>

When creating your PDF from Word, ensure that you generate a tagged PDF from improved accessibility. This can be done by using man-months). Use inclusive language that is gender-neutral (e.g., she or he, they, they, they, “Enable Chair, staff, and staff-hours, w/person-years). See the Guidelines for Bias-Free Writing for further advice selecting and examples regarding gender and other personal PDF file attributes [9]. Be particularly aware of the publisher’s considerations around writing about people with disabilities available at no cost. Note that most reviewers will use North America’s (extended) alphabetic character set for names of persons, institutions, and places (e.g., Grønbæk, Lafrenière, Sánchez, Nguyễn, Universität, Weissenbach, Züllighoven, Århus, etc.). These characters are already included in most versions and variants of Times, Helvetica, used. Standard fonts: you have done, not merely what you plan to do, and explain how your work is different from previously published work, i.e., *the unique contribution that your work makes to the field*. Please consider what the reader will learn from your submission, and how they will find your work useful. If you write with these questions in mind, your work is more likely to be successful, while being the accessibility of their submissions. Specifically, we encourage authors to carry out the following five steps:

## ACKNOWLEDGMENTS

1. Add alternative text to all figures
2. Mark table headings
3. Generate a tagged PDF who wrote and provided helpful comments on previous versions of this document.
4. Verify the default language
5. Set the tab order to “Use Document Structure”

For more information and links to instructions and resources, please see <http://chi2014.acm.org/accessibility>.

**PAGE NUMBERING, HEADERS, AND FOOTERS**  
Your final submission should not contain footer or header information at the top or bottom of each page. Specifically, your final submission should not include page numbers in the main text, nor referenced (e.g., [Gosechinsky, Initial submissions may include page numbers, but these must be removed for camera-ready. Page numbers will be added to the PDF when the proceedings are assembled, alphabetically by last name of first author. Use a numbered list of references at the end of the article, ordered alphabetically by last name of first author, and referenced by numbers in brackets. For papers from conference proceedings, include the title of the paper and the name of the conference. Do not include the location of the conference or the exact date; do include the page numbers if available. References should be in ACM citation format: [http://acm.org/publications/submissions/latex\\_style](http://acm.org/publications/submissions/latex_style). This includes citations to internet resources [1,4,8] according to ACM format, although it is often appropriate to include URLs directly in the text, as above. Example reference formatting for individual journal articles [3], articles in conference proceedings [7], books [9], theses [10], book chapters [11], an entire journal issue [6], websites [1,4], tweets [1], patents [5], and online videos [8] is given here.

## PRODUCING AND TESTING PDF FILES

This formatting is a slightly edited version of the format automatically generated by the ACM Digital Library (<http://dl.acm.org>) as “ACM Ref.” DOI or URL links and must be ACM DL Compliant. The requirements for an authors’ full first names are optional but encouraged. Do ACM Compliant PDF are available at: <http://sheridanprinting.com/typedepdf/ACM-distilling-DOT-links-or-authors-first-names.html>. Note that the HyperLink style used throughout this document uses blue links: When creating your PDF from Word, ensure that you generate a tagged PDF from improved accessibility. This

can be done by using the Adobe PDF add-in, also called PDFMaker. Select Acrobat | Preferences from the ribbon
