ABSTRACT

UPDATED—24 August 2015. This sample paper describes the formatting requirements for SIGCHI conference proceedings, and offers recommendations on writing for the worldwide SIGCHI readership. Please review this document even if you have submitted to previous years. Abstracts should be about 150 words and are required.

Author Keywords

ACM Classification Keywords: Authors' choice; of terms; separated; by semicolons; H.5.m: Information Interfaces and Presentation (e.g. HCI); Miscellaneous; See <http://acm.org/about/class/1998/> for the full list of ACM classifiers. This section is required.

ACM Classification Keywords: Authors' choice; of terms; separated; by semicolons; include commas; within terms only; required.

This format is to be used for submissions that are published in **INTRODUCTION** proceedings. We wish to give this volume a consistent high-quality appearance. We therefore ask that authors follow some simple guidelines. You should format your paper exactly like this document. The easiest way to do this is to replace the content with your own material. This document describes how to prepare your submissions using Microsoft Word on a PC or Mac.

PAGE SIZE AND COLUMNS

On each page your material should fit within a rectangle of **PAGE SIZE AND COLUMNS**, centered on a US letter page (8.5 × 11 inches (21.59 × 27.94 cm), centered between two 0.5 inch (8.5 × 11 inches), beginning 0.85 inches (1.9 cm) from the top of the page, with a 0.3 inches (0.85 cm) space between two 3.35 inches (8.4 cm) columns. Right margins should be justified, not ragged. Please be sure your document and PDF are **US LETTER** and not A4.

The styles contained in this document have been modified from the default styles to reflect ACM formatting conventions.

- ACM copyright: ACM holds the copyright on the work. This is the historical approach.
 - ~~Copyright: The author(s) retain copyright, but ACM receives an exclusive publication license.~~
 - ACM copyright: ACM holds the copyright on the work. This is the historical approach.
 - ~~Open Access: The author(s) wish to pay for the work to be open licensed.~~
 - License: The author(s) retain copyright, but ACM receives an exclusive publication license. The field is large enough to hold the appropriate release statement.
 - Open Access: The author(s) wish to pay for the work to be open access. The additional fee must be paid to ACM.
- This text field is large enough to hold the appropriate release statement assuming it is single spaced.
- Each submission will be assigned a DOI string to be included here.

Every submission will be assigned their own unique DOI string to be included here.

from the default styles to reflect ACM formatting conventions. For example, content paragraphs like this one are formatted using the Normal style.

Title and Authors

L^AT_EX sometimes will create overfull lines that extend into columns. To attempt to combat this, the c1s file has a command, \sloppy, that essentially asks L^AT_EX to prefer underfull lines with extra whitespace. For more details on this, and info on how to control it more finely, check out <http://www.economics.utoronto.ca/osborne/latex/PMAKEUP.HTM>.

Title and Authors

Your paper's title, authors and affiliations should run across the full width of the page in a single column (17.8 cm (7 in.) wide). The title should be in Helvetica or Arial 18-point bold. Authors' names should be in Times New Roman or Times Roman 12-point bold, and affiliations in 12-point regular. Names may optionally be placed in a single

See **Author** section of this template for instructions on how to format the authors. For more than three authors, you may have to place some address information in a footnote, or in a named section at the end of your paper. Names may optionally be placed in a single centered row instead of at the top of each column. Leave one-point line of white space below the last line of affiliations.

Adding and Removing Author Fields Above

If you need a block for an additional author within a different affiliation, click on the table, click "layout" under "table tools", and click "insert left" or "insert right". Then right-click anywhere on the table, click "Table Properties", and under the "Table" tab, click the tab for "Properties".

Every submission should begin with an abstract of about 150 words, followed by a set of Author Keywords and ACM Classification Keywords. The abstract and keywords should be placed in the left column of the first page under the left half of the title. The abstract should be a concise statement of the problem, approach, and conclusions of the work described. It should clearly state the paper's contribution to the field of

Abstract and Keywords

Every submission should begin with an abstract of about 150 words, followed by a set of keywords. The abstract and keywords should be placed in the left column of the first page under the left half of the title. The abstract should be a concise statement of the problem, approach, and conclusions of the work described. Other than Helvetica or Arial headings, please use sans-serif or non-proportional fonts only for special purposes, such as source code text.

Normal or Body Text

First Page Copyright Notice This template includes a sample ACM copyright notice at the bottom of page 1, column 1. Upon acceptance, you will be provided with the appropriate copyright statement and unique DOI string for publication. Accepted papers will be distributed in the conference publications. They will also be placed in the ACM Digital Library, where they will remain

Figure 1. Insert a caption below each figure. Do not alter the Caption style. One-line captions should be centered; multi-line should be justified. Numbered figures and include captions below, using Insert, Caption. All 1-line captions should be centered; justify longer captions.

Test Conditions				
Name	First	Second	Condition	Final
Na Marsden	1223.0	Se44	432,32	Final
Nass	22.2	16	234,333	
Marsden	22.9	11	44,132,321	
Borriello	22.9	11	93,123	
N Karat	234.9	220016	103,322,333	
Karat	34.9			103,322

Table 1. Table captions should be placed below the table. We recommend table lines be 1 point, 25% black. Minimize use of table grid lines.

Table 1. Table captions should be placed below the table. We recommend table lines be 1 pt, 75% grey. Minimize use of unnecessary table lines. Avoid spurious degrees of precision. For larger tables, consider banded rows (click Tables, Banded Rows) to guide the eye. In Word, we recommend using the Table Grid - SIGCHI table format.

Subsequent Pages

On pages beyond the first, start at the top of the page and continue in double-column format. The two columns on the last page should be of equal length.

First Page Copyright Notice

The first page of the document has the correct ACM SIGCHI References and Citations. Use a numbered list of references at the end of the article, ordered alphabetically by last name of first author, and referenced by numbers in brackets [1, 2, 3, 4]. Your references should be published materials accessible to the public. Internal technical reports may be cited only if they are easily accessible (i.e., you provide the address for obtaining the report within your citation) and may be obtained by any reader for a nominal fee. Proprietary information may not be cited. Private communications should be acknowledged in the main text, not referenced (e.g., [Borriello, personal communication]).

The References should be in ACM citation format: http://acm.org/publications/submissions/latex_style. This includes citations to internet resources [1, 3, 4, 8] according to ACM format, although it is often appropriate to include URLs directly in the text, as above.

SECTIONS

Subsections

The heading of a section should be in Helvetica or Arial 9-point bold, all in capitals. Sections should not be numbered, with initial letters capitalized (Heading 2 style). For sub-sections and sub-sub-sections, a word like *the* or *of* is not capitalized unless it is the first word of the heading.

Headings of subsections should be in Helvetica or Arial 9-point bold with initial letters capitalized. For sub-sections and sub-sub-sections, a word like *the* or *of* is not capitalized unless it is the first word of the heading.

Sub-subsections

Headings for sub-sub-sections should be in Helvetica or Arial 9-point italic with initial letters capitalized. Standard \section,

FIGURES AND CAPTIONS

\subsection and \subsubsection commands will work fine in this template. Place figures and tables at the top or bottom of the appropriate column or columns, on the same page as the relevant text (see Figure 1). You may wish to A figure or table may extend across both columns to a maximum width of 17.78 cm (7 in.).

Place figures and tables at the top or bottom of the appropriate

column or columns, on the same page as the relevant text (see

Figures 1). A figure or Table may extend across both columns

(to a maximum width of 17.78 cm (7 in.) (e.g., “Table 1”

or “Figure 2”), centered, and placed beneath the figure or

Captions should be Times New Roman or Times Roman 9-point bold. They should be numbered (e.g., “Table 1” or

“Figure 1”), centered, and placed beneath the figure or table.

Please note that the words “Figure” and “Table” should be spelled out (e.g., “Figure” rather than “Fig.”) whenever they occur. Figures, like Figure 2, may span columns and all figures

use color figures, which are included in the page limit, the

and notes may use color figures, which are included in the

figures must be usable when printed in black-and-white in

the proceedings; the figures must be usable when printed in black-

and-white in the proceedings.

Inserting Images

The paper may be accompanied by a short video figure up to five minutes in length. However, the paper should stand on its own without the video figure, as the video may not be manipulated in MS Word. To minimize this problem, use an image editing tool to resize the image at the appropriate

printing resolution (usually 300 dpi), and then insert the

image into Word using Insert | Picture | From File.

When possible, include a vector formatted graphic (i.e. PDF or EPS). When including bitmaps, use an image editing tool to

resize the image at the appropriate printing resolution (usually 300 dpi).

Text style (as in Table 1). For improved accessibility, header rows of tables should be marked. In Word, right-click a header row, and select Table Properties | Row |

Quotations may be italicized when “placed inline” (Anab, 23F).

Repeat as header row at the top of each page. All tables should include alt text for accessibility (Table Properties | Alt

Longer quotes, when placed in their own paragraph, need not be italicized or in quotation marks when indented

QUOTES (Ramon, 39M).

Quotes may be italicized and “placed inline” (Anab, 22F).

LANGUAGE, STYLE, AND CONTENT
Longer quotes, when placed in their own paragraph, need not be italicized or in quotation marks when indented. The written and spoken languages of SIGCHI is English.

Spelling and punctuation may use any dialect of English (e.g., British, Canadian, US, etc.) provided this is done consistently. Hyphenation is optional. To ensure suitability for an international audience, please pay attention to the following:

(e.g., British, Canadian, US, etc.) provided this is done consistently. Hyphenation is optional. To ensure suitability for an international audience, please:

- Try to avoid long or complex sentence structures.
- Write in a straightforward style.
- Briefly define or explain all technical terms that may be unfamiliar to readers.
- Try to avoid long or complex sentence structures.
- Explain all acronyms the first time they are used in your text, e.g., “Digital Signal Processing (DSP)”.
- Explain local references (e.g., not everyone knows all city names in a particular country).
- Explain B insider terms the first time they are used in your audience. Ensure that your whole audience understands any reference whose meaning you do not describe (e.g., do not assume that everyone has used a Macintosh or a particular application).

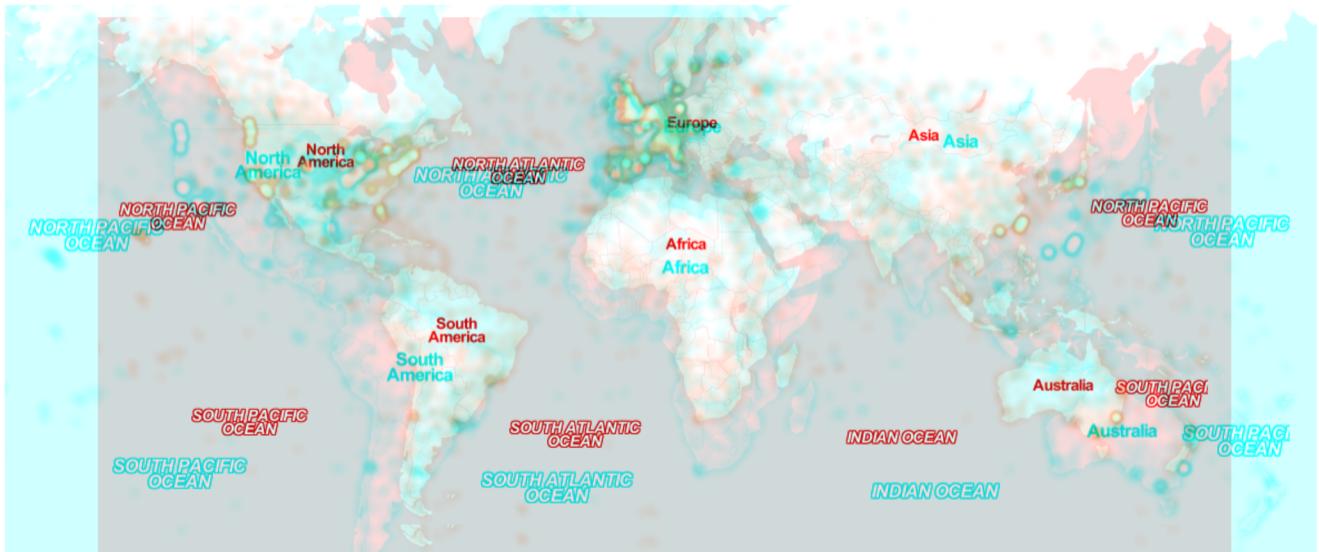

Figure 2. In this image, the map maximizes use of space. You can make figures as wide as you need, up to a maximum of the full width of both columns. Note that L^AT_EX tends to render large figures on a dedicated page. Image: ©①© ayman on Flickr.

Figure 2: Sample of a wide figure. Be sure to place at the top or bottom of the page. Ensure that important information is legible in both black-and-white and color printing. Placing images and their captions within text boxes can make document management easier. Image: CC-BY-NC ayman on Flickr.

- Explain colloquial language and puns. Understanding phrases like “red herring” may require a local knowledge of English. Humor and irony are difficult to translate across all city names in a particular country).
 - Use unambiguous forms for culturally localized concepts, such as times, dates, currencies, and numbers (e.g., “11:45–9:70” or “5/1/97” may mean 5 January or 5 May, and “seven o’clock” may mean 7:00 am or 19:00). For currencies, indicate equivalences: “Participants were paid N\$25,000, or roughly US \$22.”
 - Explain colloquial language and puns. Understanding phrases like “red herring” may require a local knowledge of English. Humor and irony are difficult to translate across all months). Use inclusive language that is gender-neutral (e.g., she or he, they, s/he, chair, staff, staff-hours, person-years). See the *Guidelines for Bias-Free Writing* for further advice and examples regarding gender and other personal attributes [9]. Be particularly aware of considerations around writing about people with disabilities.
 - Be careful with the use of gender-specific pronouns (he, she) and other gendered words (chairman, manpower, man-months). Use inclusive language that is gender-neutral (e.g., she or he, they, s/he, chair, staff, staff-hours, person-years). See the *Guidelines for Bias-Free Writing* for further advice and examples regarding gender and other personal attributes [9]. Be particularly aware of considerations around writing about people with disabilities [9].
- ACCESSIBILITY**
The Executive Council of SIGCHI has committed to making SIGCHI conferences more inclusive for researchers, practitioners, and educators with disabilities. As a part of this goal, the all authors are asked to work on improving the accessibility of their submissions. Specifically, we encourage authors to carry out the following five steps:
1. Add alternative text to all figures
 2. Mark table headings

3. Add tags to the PDF

4. Verify the default language

The Executive Council of SIGCHI has committed to making SIGCHI conferences more inclusive for researchers, practitioners, and educators with disabilities. As a part of this goal, the all authors are asked to work on improving the accessibility of their submissions. Specifically, we encourage authors to carry out the following five steps:

1. Add alternative text to all figures

Your final submission should not contain footer or header information at the top or bottom of each page. Specifically, your final submission should not include page numbers. Initial submissions may include page numbers, but these must be removed for camera-ready. Page numbers will be added to the PDF when the proceedings are assembled. For more information and links to instructions and resources, please see <http://chi2016.sigchi.org/accessibility>.

2. PAGE NUMBERING, HEADERS AND FOOTERS

Your final submission should not contain footer or header information at the top or bottom of each page. Specifically, your final submission should not include page numbers. Initial submissions may include page numbers, but these must be removed for camera-ready. Page numbers will be added to the PDF when the proceedings are assembled. For more information and links to instructions and resources, please see <http://chi2016.sigchi.org/accessibility>.

We recommend that you produce a PDF version of your submission well before the final deadline. Your PDF file must be ACM DL Compliant. The requirements for an ACM Compliant PDF are available at <http://www.acmidl.com/>. Initial submissions may include page numbers, but these must be removed for camera-ready. Page numbers will be added to the PDF when the proceedings are assembled. Test your PDF file by viewing or printing it with the same software we will use when we receive it, Adobe Acrobat Reader Version 10. This is widely available at no cost. Note that most reviewers will use a North American/European version of Acrobat reader, so please check your PDF accordingly. When creating your PDF from Word, ensure that you generate a tagged PDF from improved accessibility. This can be done by using the Adobe PDF add-in, also called PDFMaker. Select Acrobat | Preferences from the ribbon and ensure that “Enable Accessibility and Reflow with tagged Adobe PDF” is selected.

3. Set the tab order to “Use Document Structure”

We recommend that you produce a PDF version of your submission well before the final deadline. Your PDF file must be ACM DL Compliant. The requirements for an ACM Compliant PDF are available at <http://www.acmidl.com/>. Initial submissions may include page numbers, but these must be removed for camera-ready. Page numbers will be added to the PDF when the proceedings are assembled. Test your PDF file by viewing or printing it with the same software we will use when we receive it, Adobe Acrobat Reader Version 10. This is widely available at no cost. Note that most reviewers will use a North American/European version of Acrobat reader, so please check your PDF accordingly. When creating your PDF from Word, ensure that you generate a tagged PDF from improved accessibility. This can be done by using the Adobe PDF add-in, also called PDFMaker. Select Acrobat | Preferences from the ribbon and ensure that “Enable Accessibility and Reflow with tagged Adobe PDF” is selected.

When creating your PDF from Word, ensure that you generate a tagged PDF by selecting “Create PDF” from the Acrobat ribbon. You can then generate a tagged PDF by selecting “Create PDF” from the Acrobat ribbon.

CONCLUSION

It is important that you write for the SIGCHI audience. Please read previous years’ proceedings to understand the writing style and conventions that successful authors have used. It is particularly important that you state clearly what you have done, not merely what you plan to do, and explain how your work is different from previously published work, i.e., the unique contribution that your work makes to the field. Please consider what the reader will learn from your submission, and how they will find your work useful. If you write with these questions in mind, your work is more likely to be successful.

CONCLUSION

Please read previous years’ proceedings to understand the writing style and conventions that successful authors have used. State clearly what you have done, not merely what you plan to do, and explain how your work is different from previously published work, i.e., the unique contribution that your work makes to the field. Please consider what the reader will learn from your submission, and how they will find your work useful. If you write with these questions in mind, your work is more likely to be successful.

ACKNOWLEDGMENTS

Sample text: We thank all the volunteers, and all publications support and staff, who wrote and provided helpful comments on previous versions of this document. Authors 1, 2, and 3 gratefully acknowledge the grant from NSF (#1234567890-ABC). This whole paragraph is just an example. If you write with these questions in mind, your work is more likely to be successful, both in being accepted into the conference, and in influencing the work of our field.

REFERENCES FORMAT

Your references should be published materials accessible to the public. Internal technical reports may be cited only if they are easily accessible and may be obtained by any reader for a nominal fee.

Proprietary information may not be cited. Private communications should be acknowledged in the main text, not referenced (e.g., [Golovchinsky, personal communication]). References should be the same font size as other body text. References should be in alphabetical order by last name of first author. Use a numbered list of references at the end of the article, ordered alphabetically by last name of first author, and referenced by numbers in brackets. For papers from conference proceedings, include the title of the paper and they are easily accessible and may be obtained by any reader for a nominal fee. Proprietary information may not be cited. Private communications should be acknowledged in the main text, not referenced (e.g., [Golovchinsky, personal communication]). References should be in ACM citation format: http://www.acm.org/publications/submissions/paper_style. This includes citations to Internet resources [4–8], according to ACM format, although it is often appropriate to include URLs directly in the text, as above. Example reference formatting for individual journal articles [2], articles in conference proceedings [7], books [9], theses [10], book chapters [11], an entire journal issue [6], websites [1, 3], tweets [4], patents [5], and online videos [8] is given here. See the examples of citations at the end of this document and in the accompanying BibTeX document. This formatting is a edited version of the format automatically generated by the ACM Digital Library.

includes citations to internet resources [1,4,8] according to ACM format, although it is often appropriate to include URLs directly in the text, as above. Example reference formatting for individual journal articles [3], articles in conference proceedings [7], books [9], theses [10], book chapters [11], an entire journal issue [6], websites [1,4], tweets [1], patents [5], and online videos [8] is given here.

This formatting is a slightly edited version of the format (<http://dl.acm.org>) as “ACM Ref.” DOI and/or URL links are optional but encouraged as are full first names. Note that the Hyperlink style used throughout this document uses blue links; however, URLs in the references section may optionally appear in black.

DOI links or authors’ first names. Note that the Hyperlink style used throughout this document uses blue links; however, URLs in the references section may appear in black.
